Overview

Gearboxes

SIMOGEAR gearboxes are available as helical, parallel shaft, bevel, helical worm and worm gearboxes.

State-of-the-art production technology and improved testing methods ensure the highest degree of quality and reliability.

Gearbox type	Gearbox designation	Number of sizes	Maximum output torque T_{2N} Nm	Transmission ratio i -	Maximum motor power ¹⁾ P_1 kW

Overview

Adapters

With directly mounted, highly efficient motors from the LE range, SIMOGEAR offers a broad spectrum of geared motors for the most common drive applications.

Gearboxes of size 29 and larger can be supplied with a variety of mounting adapters which allow the attachment of motors from virtually all Siemens motor ranges in order to meet the requirements of special applications.

K8 Coupling adapter with flexible coupling for mounting a servo motor from the SIMOTICS M-1PH8 range	 <ul style="list-style-type: none"> Square or round shape Version for motor shafts with feather key Zero-backlash coupling 				

1 Introduction

Guidelines for selection and ordering

Article No. code

Overview

The article number comprises a combination of digits and letters. To obtain a better overview, the article number is split up into three, hyphenated blocks.

Example:

2KJ3105-1EA04-0AS1+D01

The first block (data positions 1 to 7) designates the gearbox type; the second (data positions 8 to 12) designates the output shaft and the adapter type and size; and additional design characteristics are coded in the third block (data positions 13 to 16).

Structure of the article No.

Position of the article No.	1	2	3	4	5	6	7	-	8	9	10	11	12	-	13	14	15	16	-	Z

Information required	Always	Always

Ordering example

A helical geared motor is required:

- Gearbox type, size Z59
- Adapter type and size K4-90
- Input power 1.5 kW
- Input speed 1500
- Output speed 49, transmission ratio $i = 28.89$
- Solid shaft V35 x 70
- Mounting position M1

This results in the following article No. with order codes

without feather key	S

■ Overview

Helical gearbox

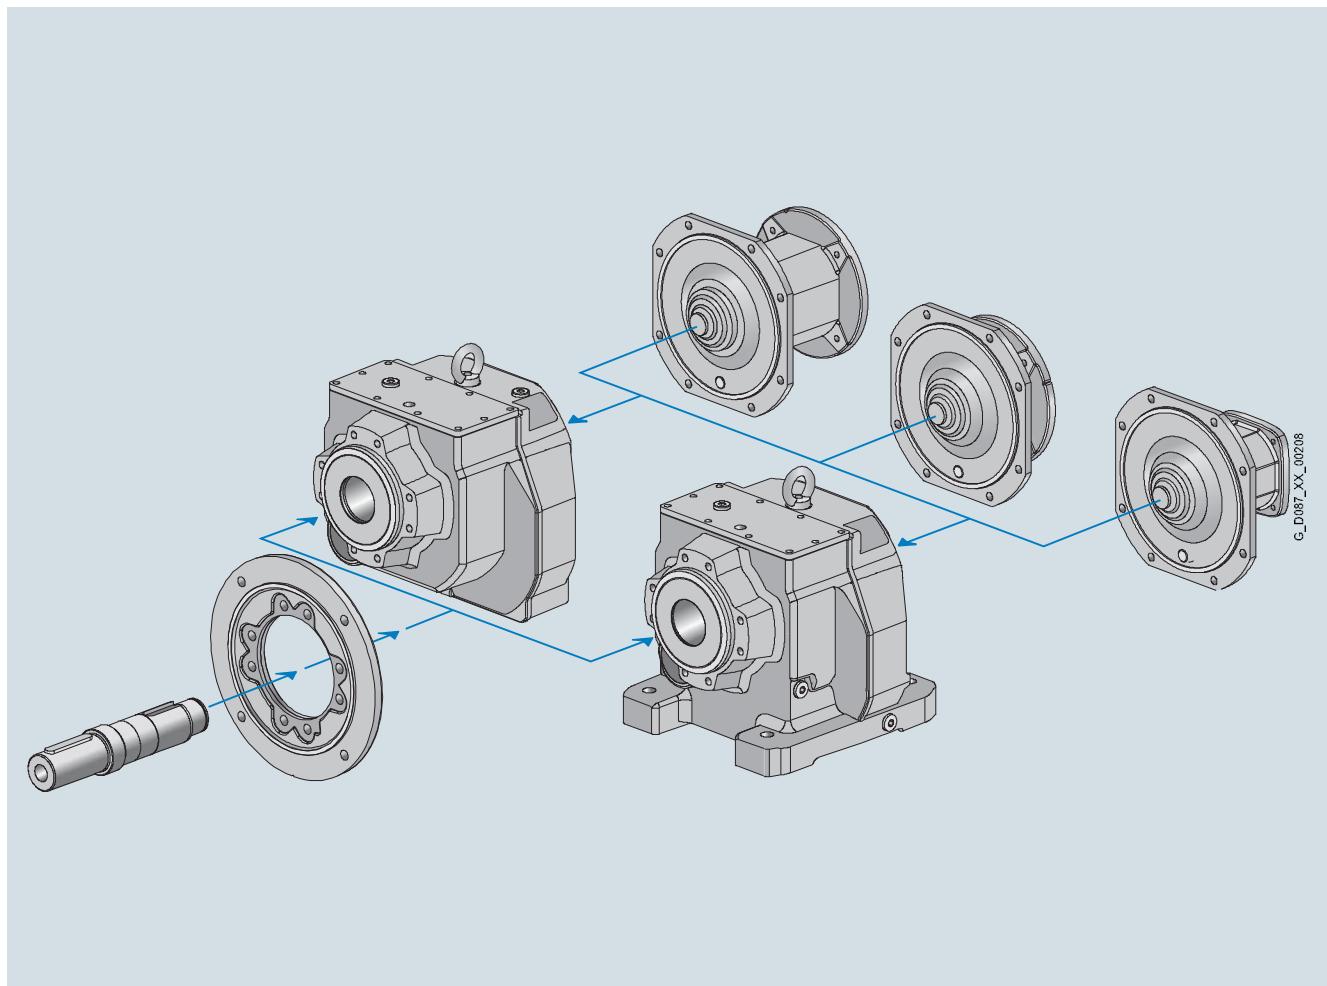

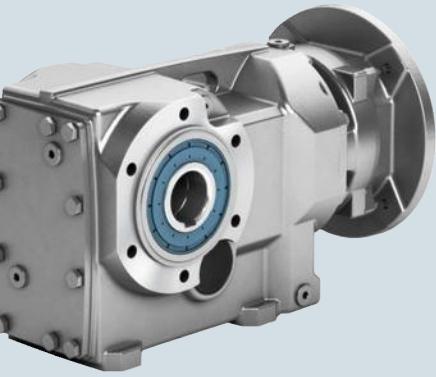

Fig. 1/10 Modular system, helical gearbox

SIMOGEAR helical gearboxes are available in the following versions for mounting in any position:

- 2 or 3 stages
- Foot-mounted design
- Flange-mounted design
- Design with integrated housing flange
- Combined foot/flange-mounted design
- Solid shaft design with and without feather key

Gearbox designation	Number of sizes	Maximum output torque	Transmission ratio	Maximum motor power
		T_{2N}	i	P_1
		Nm	-	kW
K39 ... K189 (3-stage)	10	150 ... 19 500	5.7 ... 237	200

SIMOGEAR bevel gearboxes are available in the following versions for mounting in any position:

- 2 or 3 stages
- Shaft-mounted design with torque arm
- Flange-mounted design
- Design with integrated housing flange
- Foot-mounted design
- Hollow-shaft design with feather key, splined shaft or shrink disk
- Solid shaft design with and without feather key (at one end or both ends)

For 2-stage bevel gearboxes B, the torque arm is supplied loose to enable it to be mounted as required on site. The position of the torque arm can be freely selected.

■ Pin holes

In the case of gearboxes K.Z.109 and K.Z.129, the customer's interface can be pinned on the housing flange (C type).

The output flanges have been designed to ensure the reliable transmission of the permissible torques and radial forces by the bolt connections.

If additional fastening is required, in the case of high shock loads, for example, the existing drilled pin holes can be used.

The gearboxes can also be drilled and pinned together with the machine. The listed dimensions must be complied with.

- Spring pins, heavy-duty design, to DIN 1481: Use pin holes provided in the housing flange.
- Grooved cylindrical pins with chamfer to EN 28740/ISO 8740: Drill connecting component together with housing.
